What we did for you this month

October 2026 (1–31 Oct) · 15 managed devices · 12 Microsoft 365 users

October was a steady month. We resolved 23 tickets, most within the same business day, and the monitoring agent fixed 41 issues automatically before anyone noticed — mainly low disk space and stopped print spoolers. The main event was the ISP outage on 17 Oct, when we failed the firewall over to the backup line after hours so despatch could keep trading. Support use went 1,5 hours over the 10 included hours, mostly because of that call-out; if outages recur, a second fibre line is worth discussing at the March renewal.
